I wouldn't have even played this if it was a free flash game back in the day. No way to monitor your health. No way to monitor level progression. 2 attacks, the click spam and a pointless charge attack. A few types of enemies, mainly die by obstacles not enemies. No variety. No point. No plot. No challenge. Idled for cards, deleted, hidden. If you like this genre, skip it. If you don't like this genre, don't even think about it.
